

**MINUTES OF THE TECHNICAL COMMITTEE MEETING HELD ON DT.24/03/2026 AT 04:30 PM REGARDING CORRIGENDUM ON TECHNICAL SPECIFICATION for "HEART LUNG MACHINE WITH HEATER COOLER UNIT " BASED ON QUERIES REQUESTED BY PROSPECTIVE BIDDERS AGAINST THE AMENDMENT PUBLISHED VIDE NOTIFICATION NUMBER 1601 DTD 21/02/2026 ,TENDER FLOATED FOR Dept. of CTVS for Different Medical College & Hospitals.Bid Reference No. OSMCL/2025-26/CTVS\_EQP/03**

Notification no. <u>3365</u> OSMCL/2026, Date- <u>09-04-2026</u>		Item Name -HEART LUNG MACHINE WITH HEATER COOLER UNIT			
Sl.	Bidder Name	Amendment Request / Queries raised by the prospective bidders	Amended Technical Specification (NOTIFICATION NUMBER 1601 DTD 21/02/2026 )	Justification given by Prospective Bidder	CORRIGENDUM ON AMENDMENT
1	M/S Spectrum Medical	HLM and HCU are both different machines and can be used independently. This point is biased for one Company which manufactures HLM and water based HCU together. No other companies worldwide, other than Livanova can and meet this tender requirement, so this point must be deleted	<b>Technical Specification added as:</b> The HLM (Heart Lung Machine) & HCU (Heater Cooler Unit) should be from same manufacturer and supply from the same OEM.	This additional Point must be deleted from specs which is biased to one company and does not allow other bidders to participate. There must not be any lock in specs to be included for fair participation.	No Change
2	M/S Spectrum Medical	The Quoted model of Heart Lung Machine should have Artificial Intelligence (AI) enabled software for robust safety standards and shows all optimum perfusion goal directive parameters during procedure including DO2i (delivery of Oxygen), Oxygen consumption and HCT etc.. Online blood Saturation monitoring must be available without need for any disposables. If any machine needs disposables to obtain these values, then minimum 1500 units each of arterial and venous disposable	<b>Technical Specification added as:</b> The quoted model of Heart Lung Machine should have artificial intelligence(AI) enabled software for robust safety standards and optimum perfusion goal achievement during procedure.	The AI enabled Software must display Perfusion & goal directed parameters on HLM monitor during the procedure. Saturation for arterial and venous parameters with inline blood parameters must be provided as a superior benefit for all the patients without requirement of any disposables to reduce costs, after sales procurement issues and clinically to avoid the risk of hyper lactatemia and acute kidney injuries post operatively.	No Change
